**DUAL-CURING COMPOSITE FOR CORE BUILD-UP
AND ROOT POST CEMENTATION**

KETTENBACHDENTAL

Simply intelligent

VISALYS® CORE – EASY TREATMENT

VISALYS® CORE – STABLE RESULTS

Dual-curing core build-up & root post cementation material

Visalys® Core – especially for difficult and freehand core build-ups.

EXCELLENT STABILITY

- with very good flow properties at the same time

UNIQUE ACTIVE-CONNECT-TECHNOLOGY

- for optimized adhesive bonding
- for use with common adhesives

DENTIN-LIKE GRINDABILITY

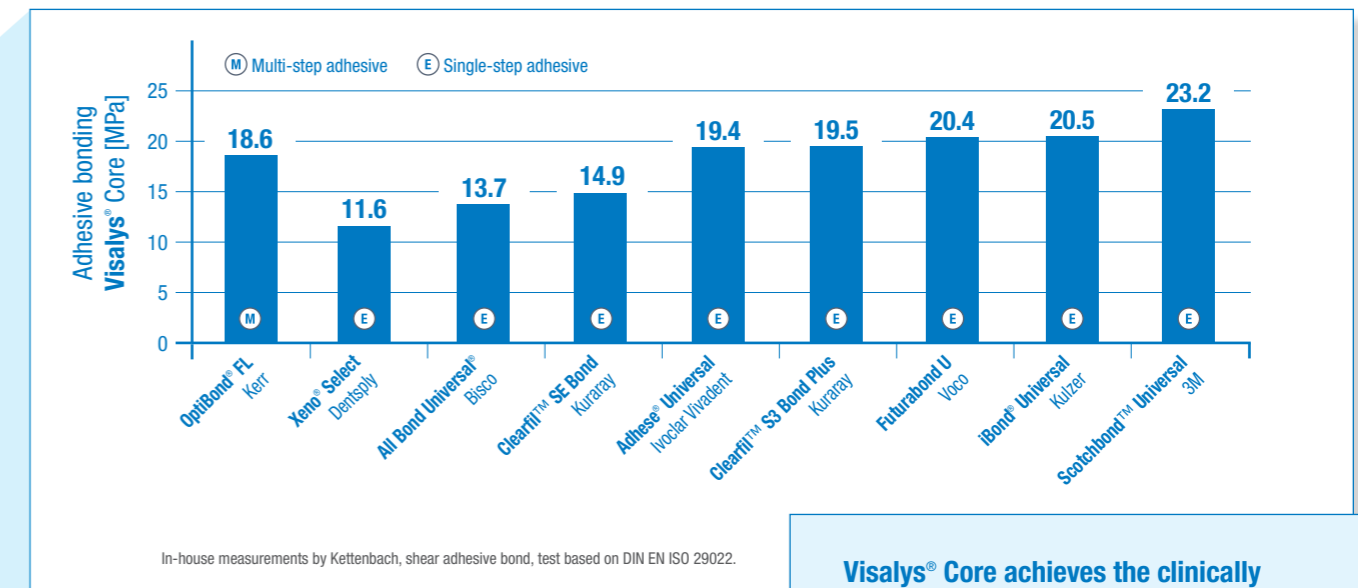

FREE OF BISPHENOL A

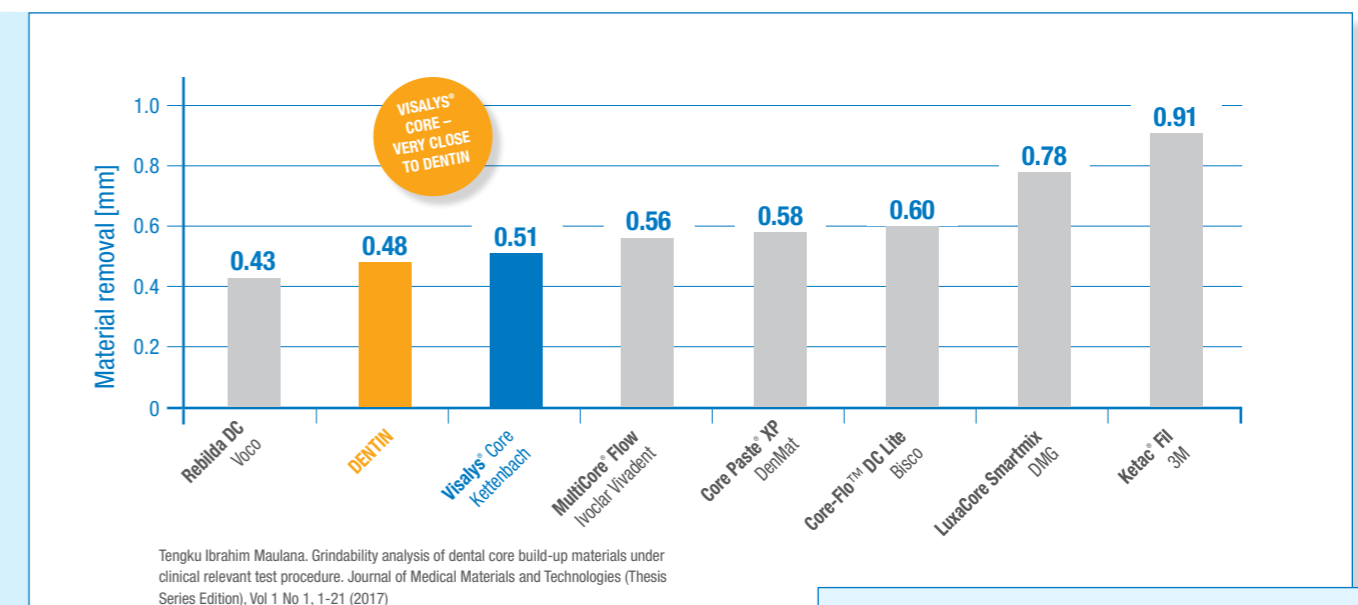

Distinguished by the experts “The Dental Advisor”

Secure bonding with all relevant adhesives

Visalys® Core achieves the clinically relevant adhesive bond of approx. 10 MPa.

Removal depth when grinding various core build-up materials

Visalys® Core can be optimally processed due to its dentin-like grindability.

VISALYS® CORE – THE RANGE
